

Hair Transplant Workshop

AUTOMATED FOLLICULAR UNIT EXTRACTION

Live patient cases and hands-on practice
July 1, 2009 – 4pm
Orange County, CA

Maximize the revenue potential of your existing practice.

This thorough hands-on workshop focuses on the rapidly growing hair transplant market and gives you an opportunity to participate transplant cases utilizing the NeoGraft™ Hair Restoration System for follicular unit extraction (FUE). This automated method requires no surgery, excision or grafting, and can be performed at twice the speed of manual extraction. Expand your patient offering and differentiate your practice from the competition.

Course Objectives

Understand principles of hair growth, loss, and hormone interaction

Review different transplant modalities and appropriate delivery

Learn the advantages of automated FUE and implantation

Review safety fundamentals and practitioner requirements

Gain confidence in adding hair transplant treatments to your practice to increase revenue
